

# Solar for Apartments with the SolShare

## The solution to access solar for your apartment

The SolShare is a ground-breaking technology that allows one rooftop solar installation to be shared by multiple apartments in the same building. Finally, apartment residents can access the benefits of rooftop solar!

## Use the power of the sun to reduce your electricity bills!

With the SolShare, apartment residents can reduce electricity bills with renewable energy generated on their roof.

## Help create a renewable energy future

Apartment residents can now join the rooftop solar revolution that is helping to transition Australia's energy system from fossil fuels to zero-carbon renewables.

## A fair share with your neighbours

The SolShare ensures every resident gets an even allocation of solar over the course of the month, delivered when it is needed the most.

## Advanced technology made simple

The SolShare constantly monitors and optimises the supply of solar. Enjoy peace of mind that you are getting the most out of your rooftop solar installation.
