

Seamlessly monitor your shared solar systems with

Comprehensive Energy Monitoring

- Oversee energy data, including solar generation and load demand.
- View whole-building or breakdown by SolShare, individual units, and common areas.

Identify Operational Issues

- Identify issues in real-time.
- Satisfy customer monitoring demand - provide individual logins for each tenancy.

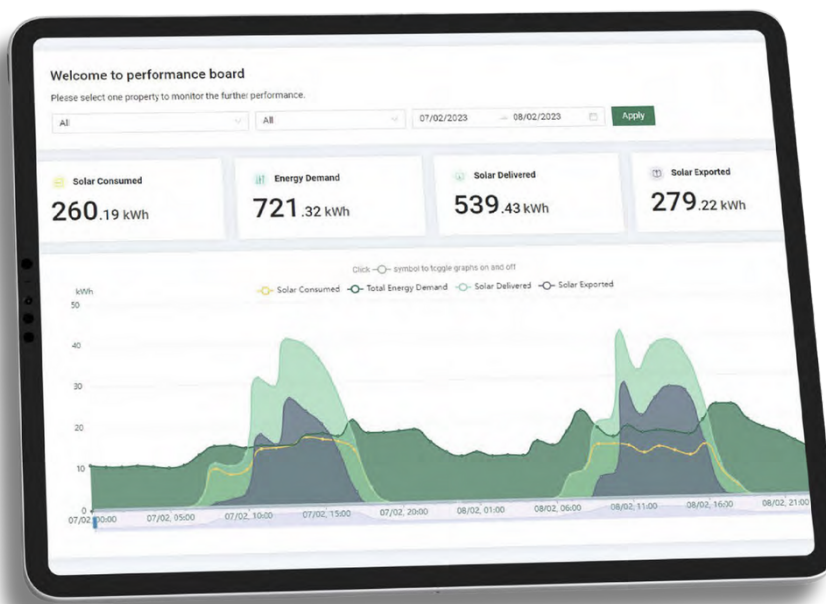

Detailed & Valuable Insights

- Understand the energy profile of individual tenancies versus common areas.
- Identify opportunities to upgrade systems or add battery capacity.

Data Accessibility & Customer Service

- Provide important information to your customers.
- Bulk download data in CSV format for further analysis and reporting.
